

Oxy - Equine

Heavily fortified with vitamins, minerals, MSM and *Oxy-Gen
 Oxy-Equine enhances performance and helps avoid nutrient-related health issues.

"I've tried every feed additive on the market and I could not see any results
 With Oxy-Equine, I could see the difference immediately
 It's the only product I would recommend"
 Chubby Turner, Weatherford , Texas

Oxy-Gen is a unique additive that improves the oxygen carrying capacity of the blood. It has special affinity for lung tissue.
With healthier lungs, horses are better able to resist diseases. Chronic coughs frequently disappear.
In extreme performance events such as cow cutting and barrel racing horses breathe easier and recover quicker.
Oxy-Gen also enhances muscling, especially across the loin and rump area...ideal for halter and sale horses.

CRITICAL NUTRIENT COMPARISON OF EQUINE SUPPLEMENTS

NUTRIENT	NUTRIENT FUNCTION	OXY-EQUINE 4 oz	Vita-Bran Joint Care 1-1½ lbs/day	Platinum Performance 4 oz 2x/day	Equi-Pro complete feed Total ration	Strategy complete feed Total Ration	Northwest Supplement 4 oz	Mega-Dose Horse Guard Inc. 3 oz
Oxy-Gen	Natural anti-oxidant, improves respiration, hair coat and muscle development	1 unit daily	0	0	0	0	0	0
Biotin	Hoof growth, shape and strength	80mg/lb	0	12 mg/lb	0	0	0	16 mg
MSM	Protection against joint inflammation	2500 mg/lb	500 mg/lb	0	0	0	0	0
Selenium	Aids in prevention of Tying Up	26 ppm	3 ppm	2 mg	.00008 oz	0.6 ppm	1.9 mg	5 mg
Vitamin E	Works with Selenium to prevent Tying Up	2000 IU/lb	400 IU/lb	2000 IU/lb	16.25 IU	0	150 IU	2000 IU/lb
Vitamin A	Coordination, respiration, bones, joints. Critical for high performance & weanlings	100 000 IU/lb	9040 IU/lb	2400 IU/lb	9750 IU	3000 IU/lb	10 000 IU	50 000 IU
Vitamin C	Benefits horses under stress & older horses	227 mg/lb	0	2000 IU/lb	0	0	0	127 mg
Zinc	Enzyme systems, metabolism, hair coat	4000 ppm	225 ppm	17 mg	.0052 oz	220 ppm	1.9 mg	400 mg
Copper	Normal bone development. With Iron and Vitamin B12, forms Red Blood Cells	1000 ppm	55 ppm	2 mg	.0026 oz	55 ppm	0	150 mg
Chelated Minerals	Provides higher mineral absorption, so minerals are more available to the horse	Zinc, Copper, Manganese, Cobalt	none	none	Iron*	none	none	none

*Iron is possibly the most abused and dangerous supplement given to horses. Iron is present in abundant amounts in all natural feeds, particularly in hay and other forages. Grains contain approximately twice the iron needed for a mature horse.

Excess iron has been proven to be toxic to foals and mature horses...reprinted from Equine Drugs and Vaccines by Eleanor M. Kellon, VMD
